

Full flow caravan system

High Flow Caravan

Run inline onsite
Use to fill tanks

The original caravan filter
Looking after travellers
since 1985

External non restrictive

Garden hose click on/off
Works on bore water
Full flow
Fittings included
Watermarked

Made for harsh Australian water conditions, High Flow is a unique dual stage external caravan filter.

Unlike other units using domestic carbon filters which reduce inlet pressure from 30-50% our High Flow delivers 30litres per min shaking hands with mains water pressure to ensure no loss of pressure throughout your van.

Dual blend stage 2 cartridge incorporating: granulated activated carbon for town and tank water areas as well as zeolite for when your in bore water areas where carbons incapable of dealing with egg gas smells, calcium and heavy mineral content.

Perfect for full size vans or motorhomes. On road tourist park use or off road free camping.

High Flow is uv treated for external use with a lifetime guarantee against sun damage, fraying or cracking and are anti freeze for use in winter.

Extends 12 volt pump, hot water service, anode & water using appliance life softening the water in the process bringing back lather in the shower and cutting upto 65% of calcium out of your water reducing scale build up inside holding tanks.

Bacteria safe, bore water effective filtration anywhere you travel

- 99% giardia, cryptosporidium
- 99% chlorine
- 99% taste, colour, odour
- 94% iron, sulphur, manganese
- 97% chemicals
- 97% pesticides, herbicides, insecticides
