Long life cartridges
Fittings included
Watermarked

Alkaliser Water Purification System is certified to the standards of the new Australian Watermark for your protection.

Designed in Australia by Freshly Squeezed Water, founded in 1985 and a pioneer in the industry who service over 100,000 Australian families with their water quality needs every year.

The Alkaliser Water Purification System is a great way for you and your family to enjoy purified alkalized water at home every day on tap.

The premium taste of purified alkalised water is often described as sweet, smooth and clean. The way water should be.

Now you can hydrate your body and mind at a fraction of the cost of bottled drinks while enjoying the benefits of improved wellbeing by eliminating acid from your water.

The Alkaliser Water Purification System is a superior and cost effective unit with 4-way filtration technology designed to target chemicals, heavy metals, allergens, pesticides, turbidity, bacteria now with the option of a fluoride removal cartridge.

The filtration media represents the latest technology in water purification with minimal servicing or space required.

Premium Alkaliser removes (not reduces)

- * 99% giardia, cryptosporidium
- * 99% chlorine, ammonia, tastes & odours
- * 94% heavy metals
- * 97% pesticides, herbicides
- * 98% allergens, pollens
- * 99% dirt, rust, sediment
- * Increase pH 7.8 -> 8.9

Adults are 72% water and children even higher.
Up to 12 cups of water is lost daily through normal bodily function and must be replaced. To do this we must hydrate.
